08:45:09 From Phillip Way to Everyone: The terminology of "overbuild" seems more associated with the concept of 'limiting competition'. Legislation needs to hear from the state on how to define overbuild in my opinion. These are wise investments to force performance of existing carriers. Fiber is the future of communication (fire, life, safety, education). There are places for wireless which meet a specific need and can be leveraged for dedicated performance in specific industry. Preventing monopolies and improving competition is a win for all consumers and industries.

08:45:57 From Phillip Way to Everyone: Great example where competition pushes prices down for more performance.
