Supporting Business Continuity through Rapid Remote Worker Enablement

Today's challenges require a **rapid** response

What you're facing

Disruption

Increased demands of network and cloud

Need for data performance, security, and resiliency

Uncertain time frame

What you can do about it

Equip workers with devices needed to work from home

Improve infrastructure connectivity and services

Enable and train employees on collaboration tools

Scale IT support and mobilize call center resources

Ensure access to business apps and network

Leverage the cloud for rapid scalability

Establish security programs: VPN, endpoints, Wi-Fi, devices, etc.

Equip workers with devices needed to work from home

Company Owned

Employee Provided

We can source laptops, chrome books, monitors, headsets, mobile devices and hotspots.

Insight

Financing to support rapid deployment

- Short Term "Rental" Equipment Leases
- Flexible Payment options
- Desktop/PC as a service
- Partner lease and finance programs

Improving infrastructure connectivity and services

Connectivity & bandwidth expansion

Home office extension

Connectivity and bandwidth expansion

- SD-WAN
- Cloud On-Ramp for SaaS and IaaS
- VDI connectivity optimization
- Accelerated addition of WAN links
- Aggregated WAN bandwidth

Home office extension

- Full office experience at home
- White glove/priority users
- Secure, encrypted connectivity

Enable and train employees on collaboration tools

Microsoft Teams Adoption

- 45 days of free access to Brainstorm's QuickHelp adoption and training solution focused on Teams
- Assistance with administration of the QuickHelp portal during the access period
- Best practices and resources for supporting new remote workers
- Access to draft collateral and communications to help end users adopt Teams with best practices in mind

Cisco Webex Enablement

- An assessment of teamwork and workshops focused on determining a vision for Cisco Webex and its impact to your organization
- A planning guide and roadmap for adoption, calling and meetings, custom solutions and Webex Control Hub configuration
- Configuration of Webex based on outcomes and decisions reached during the engagement

Insight.
Scale IT support and mobilize call center resources

Enable your agents to handle requests from anywhere

Add level 2 and 3 capacity with remote engineering support

CISCO

Microsoft

Insight

Ensure access to business apps and network

Windows Virtual Desktop

Best for organizations using Office 365 and Azure requiring full desktop access

Citrix VDI

Best for organizations licensed in the Microsoft Cloud, requires deep MS integration and advanced VDI use cases including voice and video

VMware Horizon

Best for Organizations not licensing Microsoft, require more complex configurations and need softphone support

Adopting cloud solutions for speed and scale

Cloud leverage & optimization

SaaS & IaaS solutions

- Migration & Consolidation Services
- Workload alignment, dependency mapping
- Cloud On-Ramp for SaaS and IaaS (Azure, AWS, GCP)
- Storage & data protection
- Financial management of cloud for urgent needs
- Managed Cloud Services
- BC/DR cloud-enabled plans

Insight.

Establish security program: VPN, endpoints, Wi-Fi, devices, etc.

Cloud Security

Endpoint security

- DNS, web, email & malware security
- Multi-Factor Authentication (MFA)

Virtual Private Networks (VPN)

- Next-Gen Firewalls (NGFW)
- Supplicants and provisioning
- Authentication, authorization, PKI & posture

Insight

Key services ready to address business continuity

Remote workforce & technology needs

- Virtual collaboration platforms (Video, Voice & IM)
- Desktop virtualization/VDI
- Remote access solutions
- VPN optimization
- Endpoint security
- Connectivity & bandwidth

Cloud adoption for speed and scale

- Migration & consolidation
- Workload alignment
- Cloud On-Ramp for SaaS and IaaS (Azure, AWS, GCP)
- Storage & data protection
- Financial management of cloud for urgent needs
- Managed cloud

Network & security integrations

- NAC, identity & access management
- Security/GRC programs
- NGFW, VPN & SASE
- Endpoint security
- SD-WAN/WAN optimization
- Managed SIEM
